Research

Evaluation of interchangeability (data reliability) between two different non-invasive blood pressure monitors

Study done at Nizams Institute of Medical Sciences, Hyderabad, India 2001

Data from two different monitors measuring non-invasive blood pressure was collected and plotted using Bland & Altman analysis.

Results were Published as a part requirement for procuring MD Degree, and Presented to the Annual Indian Society of Anaesthetists meeting at Ahmedabad, India in Dec 2001.

Publication

Undiagnosed Coagulopathy and Anaesthetic Implication. Journal of Anaesthesiology and Clinical Pharmacology. 1999 no 15(4):401

Presentation

(1) Undiagnosed coagulopathy: anaesthetic implications

Annual conference of Indian society of Anaesthesiologists, Andhra Pradesh state chapter held at Hyderabad, India in December 1998.

(2) Evaluation of interchangeability(data reliability)

49th National Conference of Indian society of Anaesthesiologists held on Dec 2001,Ahmedabad, India.

Audit

Current:

(1) Compliance of Surviving Sepsis Guidelines In patients admitted to Intensive care at Stobhill Hospital. Pilot of data collection in progress.

(2) Pain scores in Day case patients

Closed loop audit looking at improvement in the pain scores after establishing changes in patient information system, done at Stirling Royal Infirmary, 2005 presented to Scottish Pain Society meeting in Aug 2005.

(3) Hand Washing Compliance in Intensive Care Units at Stirling and Falkirk Royal Hospitals. (32% of patient contacts had no prior appropriate hand washing)

(4) Vaginal Birth rate in patients on labour analgesia, after previous caesarean sections

Courses

Advanced Paediatric Life support course October 2006 Aberdeen Royal Infirmary.

Advanced trauma life support provider course, June 2005, at Aberdeen Royal Infirmary.

Advanced life support Provider course, February 2003, at Royal Bolton Hospital.

Scottish simulator course for Experienced SHOs, December 2005 at Stirling Royal Infirmary

Renal support day Renal Replacement Therapy 'Physiology and technology' Course at Stirling Royal Infirmary December 2004.

Teaching

I actively participated in all teaching sessions at the Hospitals where I worked. Further I presented the following topics at the departmental meetings

- Oxygen transport
- Post operative Nausea vomiting
- Hazards of electricity in the operation theatre
- Principles of paediatric anaesthesia
- Regional anaesthesia in obstetrics
- Renal Physiology
- Inhalation Agents

Special Interests

I enjoy travelling and have visited many places in India. I am well versed with using computers and Internet for giving presentations, doing research work, and searching for needed information. I am also interested in the new developments in the information technology, which can bring a change to patient care. I regularly browse various journals, notably BMJ, and Anaesthesiauk.com for forum discussions.

I had the experience of providing medical relief work for people affected by floods in the remote parts of Andhra Pradesh, India. We worked for nine days (15 Nov to 23 Nov 1997) providing assistance to the local authorities in organizing medical camps. During my work in the camp, I realized the importance of effective management in critical circumstances.

I am a keen cricket player and played at the university level. From playing the game of cricket I learned the importance of teamwork in achieving good results. I have been the captain of Medical college team for a year.
